Improve & Measure

In order to improve, you need to measure with sophisticated and accurate tools. Investing in motionTec.sens means increased safety, optimized space, and smart data-driven decisions

Alert Staff & Anomaly Detection

Program text and email alerts to respond in real-time

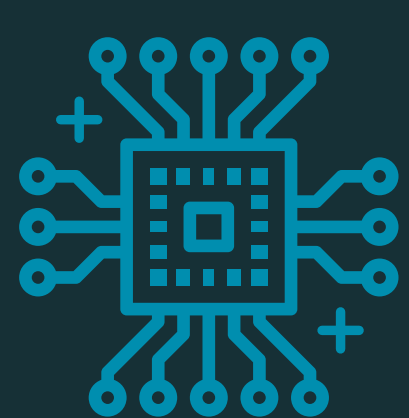

Communicate At Scale with Digital Signage

Use digital signage to inform space usage before store entry or remind customers to practice safe distancing

Plug & Play Technology

Easiest install in the market today. We can have our solution up and running in under fifteen minutes

Seamless API Integration

Harness Lightntec data to power and drive business intelligence to other solutions

Where Do We Work?

Transportation Hubs

Improve traveler experiences and safety from curb to gate

Supermarkets

Build a safe shopping environment through access control and capacity measurement

Retail

Safely reopen, protect employees and customers, and establish clear safety guidelines

Corporate Office Space

Optimize real estate by measuring occupancy and space usage in real-time

Stadiums

From concession areas to VIP lounges to bathrooms, reduce congestion and probability of contagion spread

How It Works

STEP ONE

Simply deploy our privacy-friendly computer vision sensor

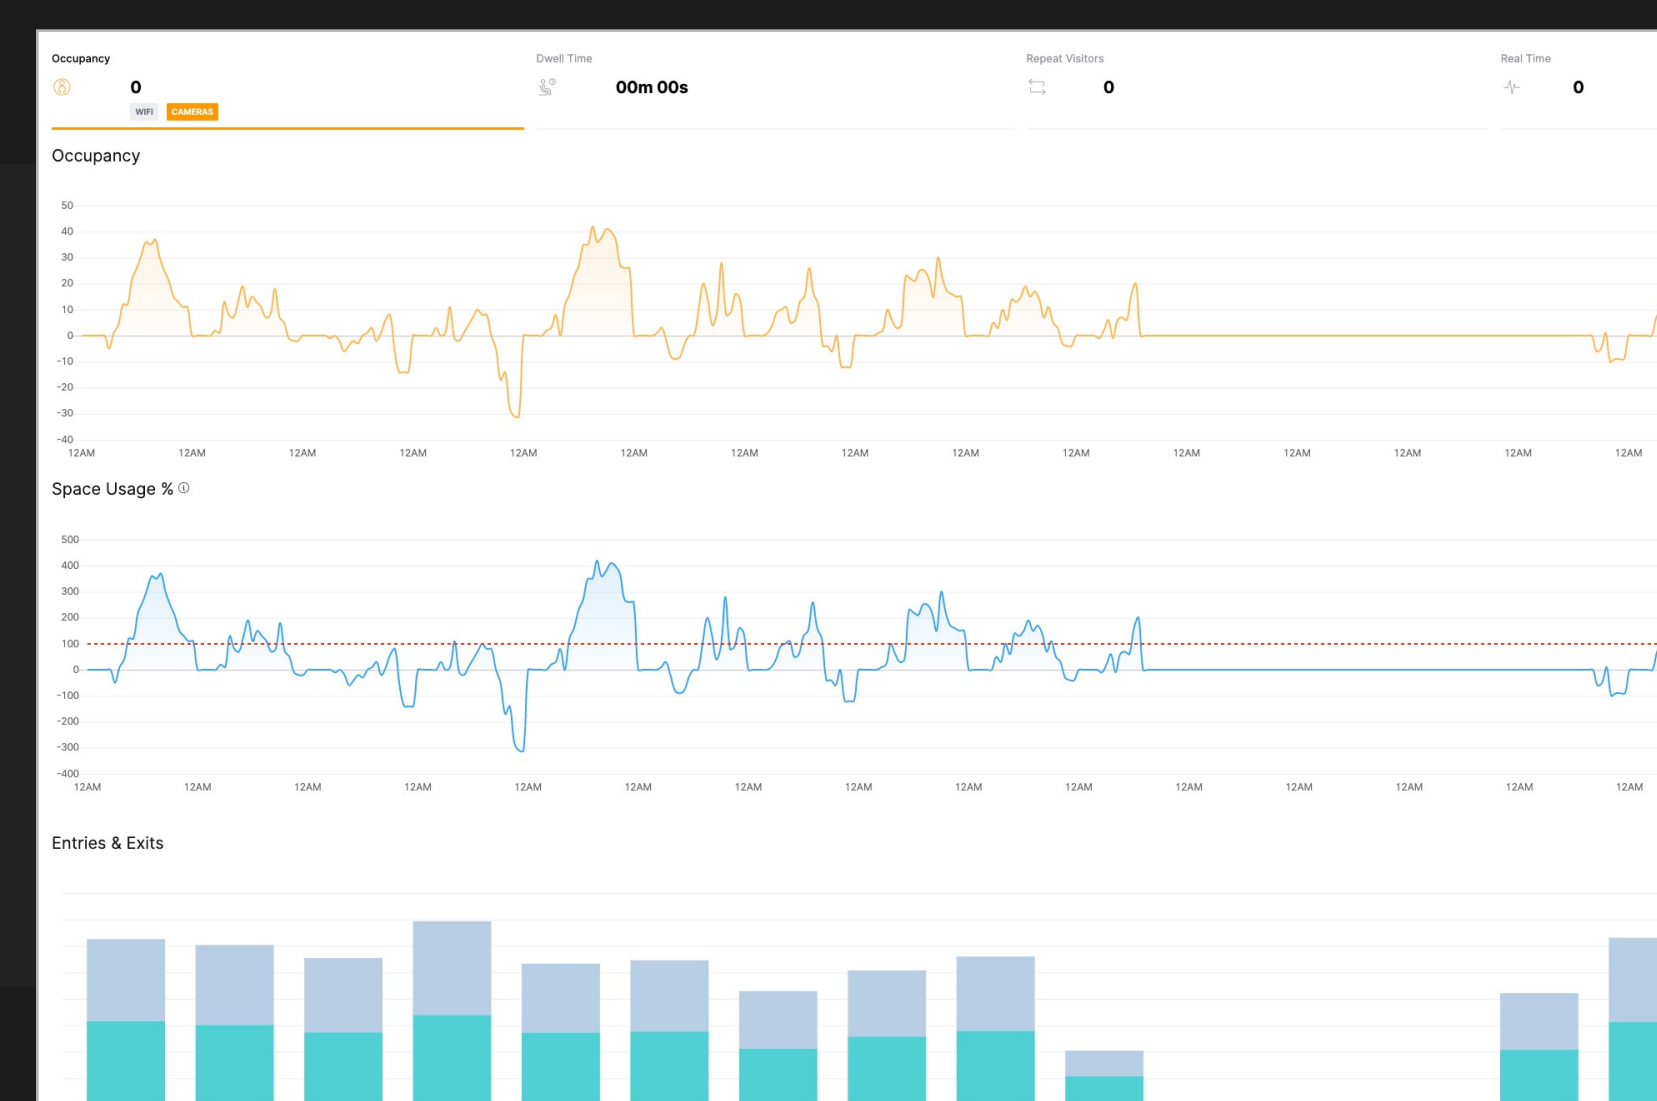

STEP TWO

Plug in our powerful media player to the back of any digital signage

STEP THREE

Login into Lightntec dashboard and start visualizing data, set up alerts, and create rule-based playlists
