

Let there be light ...

Vision of light

We live under an open sky of ever changing light in motion. Imagine you could bring this experience inside. You are in control: For every mood and at any place.

Moods like natural light, liquid light, natural and diffuse color effects, slide shows, crackling fire, holiday movies and pictures or any movie. LightnTec, the winner of German Innovation Award 2018 developed a revolutionary lighting foil. This foil allows to produce lightweight modules of moving lights.

Allowing you to bring a piece of open sky into

*your home
your office
your lobby or
your waiting rooms
and locations.*

We move light: any size - any place - any shape - any mood - ultra lightweight
